

Interview Synthesis

Across six product and creative teams, the recurring complaint was reconstruction - not a lack of tools.

01 / Split record

Files live in cloud drives, while decisions live in chat.

02 / Duplicate handoffs

Teammates download, rename, and re-upload the same material.

03 / Isolated intelligence

AI answers are useful, but each model begins without the team's history.

04 / Repeated reconstruction

People pause the work to explain what changed and which version matters.

Strongest opportunity

A shared work environment where data, people, Agents, and workflows continue from the same thread.
